DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-25, drawn to a method for transferring a media sheet, classified in class 271, subclass 114.
- II. Claims 26-29, drawn to a sheet transfer apparatus, classified in class 271, subclass 114.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by any apparatus that is capable of performing the claimed operations. In other words, the process as claimed can be practiced by another materially different apparatus. Also, the apparatus as claimed can be used to practice a process that does not engage and disengage a clutch. Accordingly, the apparatus as claimed can be used to practice another and materially different process.

3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination

purposes as indicated is proper. More specifically, the search for the process is broader in scope than the search for the apparatus.
